TO: Management and Staff involved in the Manufacturing of KASSER II

RE: NOTIFICATION OF CHANGE IN POLICY

Good afternoon gentlemen,

Because of the problems caused by an alarming number of changes to the specifications as contained in the contract for the manufacturing of **KASSER II,** I have found it necessary to inform you that no technical changes are to be implemented unless such change has been approved and signed off by me personally.

These problems were mainly caused by inadequate communication or by a complete lack of communication and therefore it is imperative that the new policy is implemented with immediate effect.

Specifications, Technical and Manufacturing changes should be centralised and communicated to the M4 Steering Committee, who could submit same to my office for the necessary approvals.

I trust that I can rely on your cooperation because I believe that it will protect everyone's best interest.

Yours sincerely

FLIP MARX
CHIEF EXECUTIVE OFFICER
